

Shrub & Tree Care Program

Insect/Disease Inspections:

- ✓ Dormant oil application to applicable shrubs/ trees, primarily woody ornamentals.
(February - March)
- ✓ Systemic application of insecticide (Imidacloprid) for season long insect control.
(March - April)
- ✓ Four or more periodic inspections of plant material between April and November
(Interim inspections may be done under high stress conditions)
- ✓ Plants will be inspected for insect, disease or other problems during each inspection
- ✓ Treatments will be applied, as needed, for control and are included in the price of inspections
- ✓ These inspections apply to shrubs and trees under 12 feet in height
- ✓ Larger plants can be treated at an additional cost

Other Services Include: [\$250 Minimum Charge]

- ✓ Deep root fertilization per recommendation
- ✓ Shrub/Tree pest control sprays per recommendation
- ✓ Specialty Plant Programs catering to individual plant needs
- ✓ Plant care consulting

Note

1. If not satisfied, or you notice problems between inspections, please contact us. We will evaluate any problems/issues, take care of the problem and/or recommend solutions.
